Associate Professor, Department of Computer Science, Indiana University (2019–)
Assistant Professor, Department of Computer Science, Indiana University (2013–2019)
Researcher, Department of Computer Science, University of Tsukuba (Spring 2012)
Visiting Assistant Professor, Department of Linguistics, Cornell University (Fall 2011)
Assistant Professor, Department of Computer Science and Center of Cognitive Science, Rutgers University (2005–2011)

Research I study what things mean that matter. I work to tap into and enhance the amazing human ability to create concepts, combine concepts, and share concepts, by lining up formal representations and what they represent. To this end, in the short term, I develop programming languages that divide what to do and how to do it into modules that can be built and reused separately. In particular, I develop so-called *probabilistic programming languages*, which divide stochastic models and inference algorithms into modules that can be built and reused separately. In the long term, I hope to supplant first-order logic by something that does not presuppose a fact of the matter what things there are, though there may be a fact of the matter what stuff there is.

Education PhD in computer science 2005, Harvard University
[Dissertation: “Linguistic side effects”](#)
Committee: Stuart M. Shieber (advisor), Barbara J. Grosz, Avi Pfeffer, Norman Ramsey
Apparently noncompositional phenomena in natural languages can be analyzed like computational side effects in programming languages: anaphora can be analyzed like state, intensionality can be analyzed like environment, quantification can be analyzed like delimited control, and so on. We thus term apparently noncompositional phenomena in natural languages *linguistic side effects*. We put this new, general analogy to work in linguistics as well as programming-language theory.

BA in mathematics 1999, cum laude in general studies, Harvard University
Phi Beta Kappa; Harvard College and John Harvard Scholarships

- Awards**
- Best paper (with Oleg Kiselyov) 2009, working conference on domain-specific languages
 - Beth dissertation award 2006, Association for Logic, Language and Information
 - Best paper (with Balder D. ten Cate) 2002, ESSLLI student session
 - First place (with Dylan P. Thurston) 2001, ACM ICFP programming contest
- Books**
- Continuations and natural language. Chris Barker and Chung-chieh Shan. Oxford University Press, 2014.
 - The Microsoft conspiracy*. Chung-chieh Shan and Kaihsu Tai. Taipei: Informationist, 1995.
- Book chapters**
- Continuation hierarchy and quantifier scope. Oleg Kiselyov and Chung-chieh Shan. In *Formal approaches to semantics and pragmatics*, ed. E. McCready, Katsuhiko Yabushita, and Kei Yoshimoto, 105–134. Springer, 2014.
 - Fun with type functions. Oleg Kiselyov, Simon Peyton Jones, and Chung-chieh Shan. In *Reflections on the work of C. A. R. Hoare*. ed. A. W. Roscoe, Cliff B. Jones, and Kenneth R. Wood, 301–331. Springer, 2010.
 - Axiomatizing Groenendijk’s logic of interrogation. Balder D. ten Cate and Chung-chieh Shan. In *Questions in dynamic semantics*, ed. Maria Aloni, Alastair Butler, and Paul Dekker, 63–82. Elsevier, 2007.
 - Linguistic side effects. In *Direct compositionality*, ed. Chris Barker and Pauline Jacobson, 132–163. Oxford University Press, 2007. Presented since 2002 at the Universities of AZ, BC, CA San Diego, IL Urbana-Champaign, PA, Rochester, UT, VT, and WA; Boston, Brown, Cornell, Harvard, Indiana, Rutgers, and Stanford Universities; City College of New York; DIMACS; MIT; logic and computational linguistics workshop; New England programming languages and systems symposium; Oregon Graduate Institute; direct compositionality workshop.

Reasoning about contexts in Henkin models. Chris Barker and Chung-chieh Shan. Workshop on lambda calculus and formal grammar, 2008.

Embedding languages. Rutgers computer science, 2007.

Lightweight static guarantees. Oleg Kiselyov and Chung-chieh Shan. Poster presented at USENIX technical conference, 2007.

Non-adjacent probabilities: must they inform word learning? Dana L. Chesney and Chung-chieh Shan. Poster presented at Association for Psychological Science convention, 2007.

Quotation and effects in natural language: three applications. Oleg Kiselyov and Chung-chieh Shan. IFIP Working Group 2.11 (program generation), 2007.

Quoting side effects. 13th annual Reflections | Projections computing conference, ACM UIUC, 2007.

Language machines. DIMACS Research Experience for Undergraduates seminar, 2006.

Mutable bindings in evaluation contexts. Lightning talk, Workshop on mechanizing metatheory, 2006.

Against the division of labor in scope and binding. Linguistic Society of America 79th annual meeting, 2005.

On Anna Szabolcsi’s paper “Proof-theoretic semantics”. Rutgers semantics workshop, 2005.

Interaction meanings and intermeaning actions. Rutgers semantics reading group, 2005.

Other projects

McBride A BIB \TeX bibliography style that follows the “Documentation Two” specifications in the *Chicago Manual of Style*. 2002–2004.

longtable A modified version of \LaTeX ’s longtable package that fixes many bugs. 2003.

psbind A program that trims and reassembles pages in a PostScript document for n -up printing. If you dislike how psnup leaves too much white space in its output, this program is for you. 2001–2003.

Miss Protocol An advice column on computer technology. 2000–2003.

split-linguist A filter to split up digest messages from the LINGUIST mailing list. 2001–2002.

A Haskell 98 implementation of Guy L. Steele, Jr., *Building interpreters by composing monads*, in *POPL ’94: conference record of the annual ACM symposium on principles of programming languages*. 2001.

bif2bnt A Web service to convert Bayes nets from BIF format to BNT format. 2000.

fmt2 A program that reformats Chinese text in Big-5 encoding. It breaks lines intelligently using an algorithm similar to that of \TeX . 1998–2000.

The first movement of a sonatina in C major 1999.

Course Decision Assistant Geoffrey Mainland, Chung-chieh Shan, and Alex Wong. An online searchable course catalog for Harvard University. 1996–1999.

Change my signature A Web service that lets anyone change the signature file I use in my personal email messages and Usenet postings. 1997.

huhebi: the self-organizing narrative An early experiment in hypertext collaboration. 1995.

Miscellany Academic: academia advice, computational linguistics, computer science, research ideas, terminology lookup, typesetting. Other: bicycle, comics recommendations, deaf people, digital piano selection advice, midnight ambiance, sexual orientation, silicon wall clock, string collection, twelve days of the invasion.

Professional activities

Editorial board: *Semantics and Pragmatics*.

Program committee: ICFP (international conference on functional programming) 2019. PLP (workshop on probabilistic logic programming) 2019. TyDe (workshop on type-driven development) 2019. FLOPS (international symposium on functional and logic programming) 2018. GPCE (generative programming: concepts & experience) 2018. ICML (international conference on machine learning) 2018. NeurIPS (conference on neural information processing systems) 2018 (reviewer). PLP (workshop on probabilistic logic programming) 2018. AAAI conference on artificial intelligence 2017. ESOP (European symposium on programming) 2017. ICML (international conference on machine learning) 2017. NIPS (conference on neural information processing systems) 2017 (reviewer). PEPM (workshop on partial evaluation and program manipulation) 2017. PPDP (international symposium on principles and practice of declarative programming) 2017. POPL 2017 workshop on probabilistic programming semantics (chair). AISTATS (international conference on artificial intelligence and statistics) 2016. ICML (international conference on machine learning) 2016. NASSLLI (North American summer school in logic, language, and information) 2016. PEPM (workshop on partial evaluation and program manipulation) 2016. POPL 2016 workshop on probabilistic programming semantics (chair). AISTATS (international conference on artificial intelligence and statistics) 2015. CoCoNat (conference on computing natural reasoning) 2015. ESSLLI 2015 workshop on bridging logical and probabilistic approaches to language and cognition. FARM (workshop on functional art, music, modelling and design) 2015. NIPS (conference on neural information processing systems) 2015 (reviewer). CVSC (workshop on continuous vector space models and their compositionality) 2014. ICFP (international conference on functional programming) 2014. Amsterdam colloquium 2013. APLAS (Asian

symposium on programming languages and systems) 2013 (chair). Haskell symposium 2013 (chair). *SEM (lexical and computational semantics) 2012. AISC (artificial intelligence and symbolic computation) 2012. LACL (logical aspects of computational linguistics) 2012. NASSLLI (North American summer school in logic, language, and information) 2012. Off the beaten track: underrepresented problems for programming language researchers 2012. Onward! 2012. WGP (workshop on generic programming) 2012. Continuation workshop 2011 (chair). DSL (domain-specific languages) 2011 (chair). GPCE (generative programming and component engineering) 2011. LACL (logical aspects of computational linguistics) 2011. ML workshop 2011 (chair). PEPM (workshop on partial evaluation and program manipulation) 2011. UAI (uncertainty in artificial intelligence) 2011. AISC (artificial intelligence and symbolic computation) 2010. ESSLLI (European summer school in logic, language and information) 2010. FLOPS (international symposium on functional and logic programming) 2010. Haskell symposium 2010. NASSLLI (North American summer school in logic, language, and information) 2010. UAI (uncertainty in artificial intelligence) 2010. APLAS (Asian symposium on programming languages and systems) 2009. IFL (implementation and application of functional languages) 2009. Continuation Fest 2008 (chair). GPCE (generative programming and component engineering) 2008. ICFP (international conference on functional programming) 2008 (poster chair). Haskell workshop 2007. PLPV (programming languages meets program verification workshop) 2007. Scheme workshop 2007.

Member: Association for Logic, Language and Information. IFIP TC2 working group on program generation.

Other

experience

Chief technology officer, Idiom Technologies (Waltham, MA), 1999–2000.

Research intern, Mitsubishi Electric Research Laboratory (Cambridge, MA), summer 1998. (Mentor: Matthew Brand)

Research intern, Center for the Neural Basis of Cognition (Pittsburgh, PA), summer 1997. (Mentor: Tai Sing Lee)

Software design engineer, Microsoft Corporation (Redmond, WA), summer 1996.

December 25, 2020
